

Schmack Biogas establishes a new branch in Greece

The consolidation of the presence in the Greek market of Schmack Biogas, a PLC Group company, also involves the establishment of a branch in Athens.

Bolzano, April 8, 2022. Schmack Biogas Srl, a PLC Group company, announces the establishment of its Greek branch, Schmack Biogas Greece, based in Athens.

A decision dictated by the potential of the Greek market, and by the number of orders that the Bolzano-based company has acquired over the past three years: in fact, two biogas plants have already been built, one construction site is open, and another two will see the start of work during 2022.

"Thanks to Schmack Biogas Greece we aim to consolidate our presence in Greece, building a direct connection with the territory, on the one hand to facilitate the acquisition of new projects and on the other hand to establish long-term business relationships, especially with regard to maintenance and biological assistance on the plants built. This is a key step for the international growth of the company and of the PLC group", Nicolò Cariboni, Managing Director and Director International Markets, said.
